2. DESCRIZIONE DEL PROGRAMMA

Target Group	Disadvantaged women and girls – Nursing and Midwifery undergraduate students.
Priorities Addressed	The BIP program 2026 aims to promote the development of women's health-related international perspectives, and intercultural competence, through shared mutual learning environments. It is specifically designed to link health students who have different cultural, social, and geographical perspectives and experiences.
Objectives and Description	<ul style="list-style-type: none"> -Developing civic engagement and active citizenship, "An international experience for all", -Ensuring a quality partnership, developing transnational teaching activities and internationalisation at home, -Improving the language and intercultural skills of students, -Developing the digital skills of students and thus promoting environmentally friendly practices,

	-Ensuring the visibility of the results obtained.
Methods and Outcomes	The programme will be based on a combination of different approaches such as: frontal lectures, facilitated team work, workshops, and visits. Each group of students' will be provided with a specific case-study and asked to develop an holistic strategy to address the related emerging issues. The adopted strategy will be presented during a plenary session in the form of a PowerPoint Presentation or a Poster Presentation, or a Podcast or a Vodcast that will be assessed by the tutors as per the BIP assessment strategy.
